CAREER SUMMARY

Full Stack Developer with 5 years of experience building scalable web and mobile applications using Node.js, React, Next.js, React Native, and MongoDB. Experienced in developing end-to-end solutions including REST APIs, authentication systems, database architecture, and real-time applications. Improved application performance by 20–40% through optimized backend APIs, code splitting, and scalable system design. Worked on AI-assisted development, IoT platforms, and cross-platform mobile apps serving 200K+ active users. Also led a team of developers, maintained coding standards, and delivered production-ready full-stack solutions.

EXPERTISE

Node.js, Express.js, and MongoDB Development | React.js, Next.js, and React Native Development | Cross-Platform Solutions with Expo | Modern JavaScript/TypeScript (ES6+) | REST API and Backend Architecture | State Management and Scalable Application Design | Performance Optimization and Core Web Vitals | Responsive Mobile-First UI Development | Real-Time IoT Dashboard Engineering | AI-Driven Development (Cursor AI, Antigravity) | Mentorship, Code Reviews, and Agile/Scrum Collaboration

TECHNICAL SKILLS

Frontend & Mobile: React.js, Next.js, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS

Backend: Node.js, Express.js, MongoDB, REST APIs

State & Data: Redux Toolkit, React Query, Context API, React Hooks, Zustand, Axios

UI Libraries: Material UI, Shadcn/ui, Radix UI, Ant Design, Styled Components

Testing: React Testing Library

Performance: Code Splitting, Lazy Loading, Lighthouse, Core Web Vitals (LCP/CLS/FID), WCAG 2.1

Tools & Build: Webpack, Vite, Babel, Expo, Storybook, npm, Yarn, Git, GitHub, GitHub Actions

Design: Figma

Task Management: Jira, Trello, Agile/Scrum

LEADERSHIP & TEAM MANAGEMENT

- Led a team of 4 developers, managing project architecture, code reviews, and technical decisions
- Established coding standards and Agile workflows, reducing production bugs by 20%
- Conducted sprint planning, standups, and ensured timely project delivery
- Mentored junior developers through code reviews and technical guidance
- Designed scalable full-stack architectures, APIs, and deployment strategies
- Collaborated with clients and stakeholders for requirements, estimations, and project updates

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | (Beyond Root Technology Pvt. Ltd.) June 2024 – Present

Mohali, India

- Led development of 5+ production web and mobile apps (React.js, Next.js, React Native), achieving 20-35% performance improvement via code splitting, lazy loading, and Lighthouse-driven optimization.
- Designed reusable component library of 40+ components adopted across all active projects, reducing team development time by ~25%.
- Delivered cross-platform Android and iOS apps with Expo, cutting separate codebase maintenance overhead by ~50%.
- Architected state management layer (Redux Toolkit + React Query) across 5 apps, eliminating redundant API calls and improving TTI by an average of 1.2s.

Frontend Developer | (Beyond Root Technology Pvt. Ltd.) June 2021 – May 2023

Mohali, India

- Built React-based real-time IoT dashboard monitoring 200K+ smart meters at 500K+ data events/hour via WebSocket, replacing a legacy desktop tool entirely.
- Created analytics and reporting visualizations (Chart.js, Recharts) used by 30+ operations staff daily, cutting manual report generation time by 60%.
- Developed role-based admin system for 5+ client organizations with granular permissions, user management, and audit logging.
- Implemented responsive design system (320px-1440px) ensuring UI consistency across Android, iOS, and web from a single codebase.

PROJECTS

EHES – Enterprise Head-End System — *React.js, Redux-toolkit, WebSocket, Axios*

- Delivered enterprise-level system managing large-scale meter data monitoring for utility clients across multiple regions.
- Increased UI rendering performance by 40% through component virtualization, memoization, and elimination of unnecessary re-renders.
- Implemented role-based access control (RBAC) with real-time data insights, supporting 5+ distinct user permission levels.

EQ Network — *React.js, Redux-toolkit, Chunk Upload API, Axios*

- Built scalable video hosting system supporting uploads up to 100GB with resumable, chunked upload handling — zero data loss on network interruption.
- Implemented adaptive bitrate streaming experience optimized for mobile, tablet, and desktop with automatic quality adjustment.
- Designed intuitive content management interface enabling non-technical staff to upload and publish videos without developer involvement.

Canadian Peptide — *React.js, Next.js, Node.js, MongoDB, Stripe, Axios*

- Engineered full-stack e-commerce application with product catalog, cart, and multi-step checkout flow with form validation and error handling.
- Integrated Stripe payment gateway for secure transactions with webhook-based order confirmation.
- Designed admin panel for inventory management, order tracking, and product control used by business operations team.

Meter Test Automation — *React.js, React-Query, REST API, Axios*

- Created automated workflow engine for electrical meter testing, replacing a fully manual process and reducing test cycle time by ~40%.
- Implemented validation rules for pass/fail scenarios with live result tracking and CSV/Excel export support for compliance reporting.

E-Kanban Web & Mobile Application — *React.js, React Native, Expo, React-Query, Axios*

- Built inventory and production tracking system with centralized dashboard providing real-time material flow visibility across factory floor.
- Automated low-stock alerts via push notifications, preventing operational delays — reduced stockout incidents by ~30%.

EDUCATION

Bachelor of Science — Information Technology | *Doaba College, Guru Nanak Dev University (GNDU) 2017 – 2020*
